Primary Research Question

Among male artists, is there an association between winning a Grammy and the genre of music that he plays?

problem

7/7 points (graded)

Write Your Conclusion

There an association between winning a Grammy and the Genre of music an artist plays. The probability of winning a Grammy, regardless of Genre, is %.

However, examination of a table containing both Grammy and Genre showed that the probability of winning a Grammy changes by genre. If an artist is in the Country Genre, the conditional probability of winning a Grammy is %, while if an artist is in the

Genre, the conditional probability of winning a Grammy is 28.6%. Visual examination of the barplot shows the conditional probabilities of winning a Grammy are across Genres.
