Primary Research Question

How long do animals stay in the shelter before they are adopted?

problem

7/7 points (graded)

Write Your Conclusion

Answer the question and support your answer with statistics:

On average, animals spent fewer than two ✓ in the shelter before being adopted (✓ = 13 days, IQR = 30 days). The length of time was highly skewed to the ✓, however. The longest period of time an animal was in the shelter was ✓ days before being adopted. This animal was a 2-year-old ✓ that entered the shelter injured. The middle 50% of the distribution were

adopted between  and 
days.
